

WHY MIMCO...

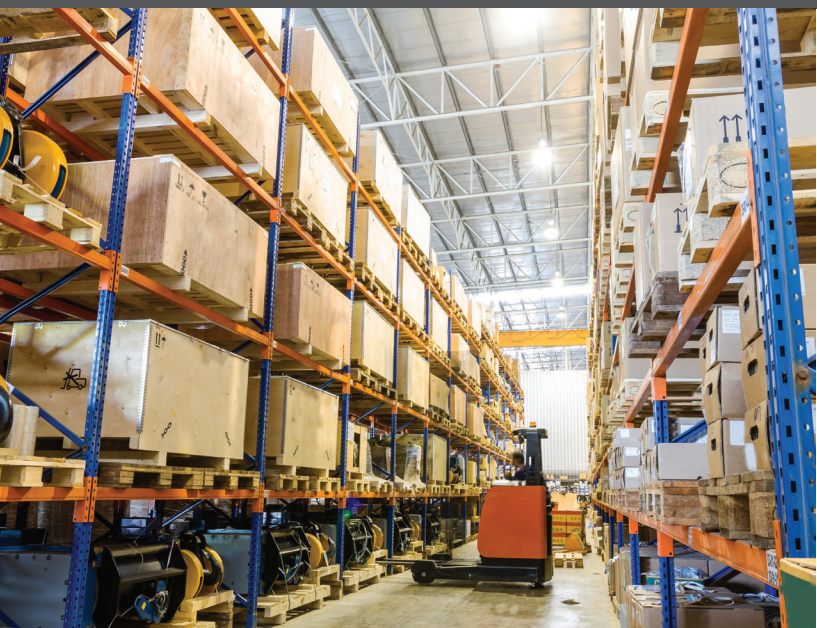

MOTOR INTEGRATION FOR MANUFACTURING COMPANIES

Practicing the art of supply since 1983

IT'S NOT JUST BUSINESS, IT'S PERSONAL

Decades of experience have taught us that each customer faces unique challenges and threats. Sometimes you need an out of the box solution for a difficult application. Other times, you need to track down a replacement for an obsolete product. At all times, you need a supply chain solution specifically tailored to your work flow. At Mimco, we take time to learn about your needs. Because at Mimco it's not just business, it's personal.

INSTANT ECONOMIES OF SCALE

Mimco brings your company instant economies of scale. When you trust Mimco as your supplier, you join a host of manufacturers, whose combined buying power rivals the largest players in the industry. Whether you're a start-up or Fortune 500 company, you'll find value partnering with Mimco. Put us to the test. Request a quote today.

NO MOTOR IS AN ISLAND

A motor transforms electrical power into mechanical energy. When you attach a motor to a fan, it spins. When you attach it to a conveyor, it moves. Products come alive to power our world. Mimco provides the motors and the products needed to start, control, and connect them to your equipment. Ask us about our extensive line of electrical components, VFD drives, shafts, bearings, pulleys and belts. Because no motor is an island.

THE GOLDEN RULE

"Do to others as you would have them do to you."

These challenging words are at the core of our company's philosophy. Therefore, we strive to handle your needs promptly, politely and professionally. Whether it's answering a call, providing a quote, or filling an order, we endeavor to serve you the way we would want to be served. At Mimco, customer service is not a department or a title. It's our passion.
